technopole

Haute-Normandie,

an attractive and dynamic region

With a potential of **2 000 researchers and experts**, the region holds considerable assets for professionals in this sector.

The chemical-biology-health sector includes a range of **expertise and leading edge equipment** covering a network of international businesses.

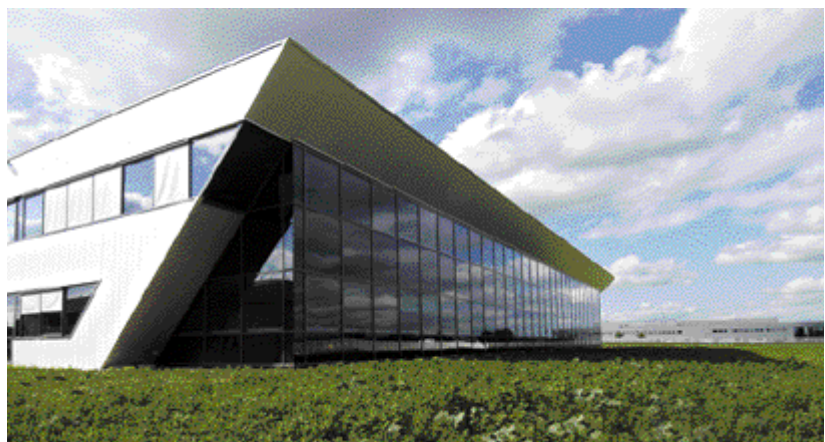

2nd region in France
for pharmaceutical chemistry

More than **8 700** employees
in the pharmaceutical industry

2 000 researchers
and experts in the sector

More than **150** industrial
establishments in chemistry
and pharmaceuticals

The **3** biggest pharmaceutical
groups in the world installed
in this region

Technopole *chemistry - biology - health*

Connecting Research and Industry

High level academic research

- **IFRMP 23** (European Institute for Peptide Research)
- **IRCOF** (Research Institute in Fine Organic Chemistry)
- **Rouen University Hospital and Faculty of Medicine and Pharmacy**

And many others

International companies

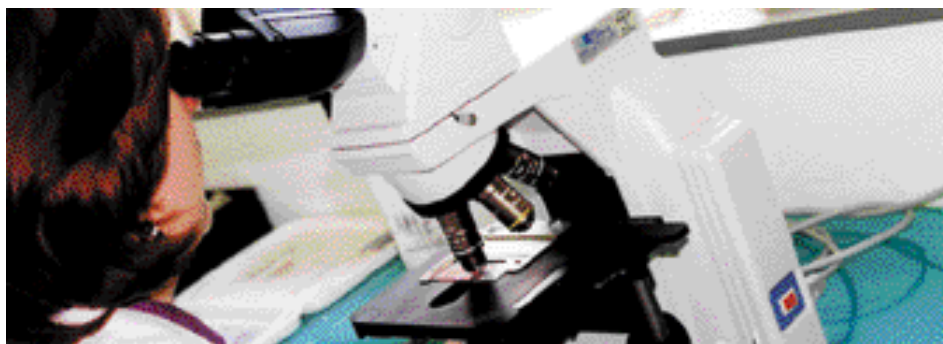

With more than **150 high-potential companies**, pharmaceuticals and chemistry are the region's leading flagship industries. The big names in pharmaceuticals and chemistry are installed in Haute-Normandie: *Sanofi-aventis, GlaxoSmithKline, Johnson & Johnson, Oril/Servier, Valois Pharm, Exxon Mobil, Total,...*

Ideal geographic location and infrastructures

The region is fitted with a remarkable network of motorways, railways and port facilities, linked to Europe and the world.

A **large range of accommodation possibilities** is also available close to these major routes, particularly in dedicated business parks.

The Chemistry-Biology-Health "Technopole"

The Technopole is your partner to put you in touch with contacts in the chemistry-biology-health sector: companies, researchers, interface structures etc., and promote the development of your **innovative activities** in Haute-Normandie.
